

Net zero by 2050

Our path to net zero by 2050 at the latest, with actionable steps and key milestones across our value chain.

Net zero by 2050

Human rights

Safeguarding people

By respecting and advancing human rights in our value chain, we are building a foundation that contributes to a resilient future for our planet and its people.

Forest Positive strategy

Helping conserve and restore forests and natural ecosystems

By moving from managing deforestation risks to helping to conserve and restore forests and natural ecosystems, while promoting sustainable livelihoods and working to respect and promote human rights.

Rural development and livelihoods

Supporting communities

By sourcing ingredients that are produced sustainably we seek to make a positive contribution to individuals, communities and the planet.

Improving operational efficiency

Reducing our emissions

By moving to renewable energy sources at our sites and switching to lower-carbon alternatives in our logistics.

Tackling our Scope 1 and 2 direct and indirect business emissions

Minimizing our Scope 3 indirect value chain emissions

Water

Managing water resources

By improving efficiency and helping to restore natural resources.

Regenerative agriculture

Carbon capture in soil and plant biomass

By working with farmers as they shift to regenerative ways of growing ingredients for food.
